

Cashless Payment Option for Illinois Lottery Vending Machines

QUICK REFERENCE GUIDE & FREQUENTLY ASKED QUESTIONS

Cashless Payment Option for Illinois Lottery Vending Machines

QUICK REFERENCE GUIDE & FREQUENTLY ASKED QUESTIONS

The Illinois Lottery is introducing the ability for players to use a cashless payment option on most of our vending machines statewide. Both types of vending machines, Winstation 30 (Win30) and DreamTouch Smart (DTS), will be equipped with an Ingenico Lane3600 device which will enable the machine to accept cashless payment methods (credit card, debit card, prepaid card, and mobile device) for purchases of draw-based games, Instant Tickets, Fast Play™ and Fast Play Scan-N-Play tickets. This guide will help you address any questions you or your customers may have about the cashless payment option on your vending machine.

FREQUENTLY ASKED QUESTIONS

What does “Cashless Payment” mean?

Cashless Payment means payment using a credit card, debit card, prepaid card or mobile device.

What are the supported credit card types?

The following are the supported credit card types that can be used on the cashless payment device: MasterCard, Visa, Discover, and prepaid cards of the same issuers. American Express is not a supported credit card type at this time.

Are mobile device payments (e.g. Apple Pay, Google Pay, Samsung Pay) accepted by the cashless payment device?

Yes, mobile device payments are accepted.

What if I want Intralot to install the cashless payment device on the Photon machine instead of the vending machine?

This is not possible as the equipment belongs to the Illinois Lottery and they determine where the device gets installed.

Does the installation of the cashless payment device mean that the vending machines will no longer accept cash?

No, the vending machines will continue to accept cash for Illinois Lottery purchases.

Please note: Cashbox retailers will NOT receive cashless payment devices.

Where will the cashless payment device be installed?

The cashless devices will be installed on both types of Illinois Lottery vending machines, the WinStation30 (Win30) and the DreamTouch Smart (DTS). The device will be permanently attached to each vending machine on the right-hand side. The height of the device will be compatible with ADA accessibility guidelines.

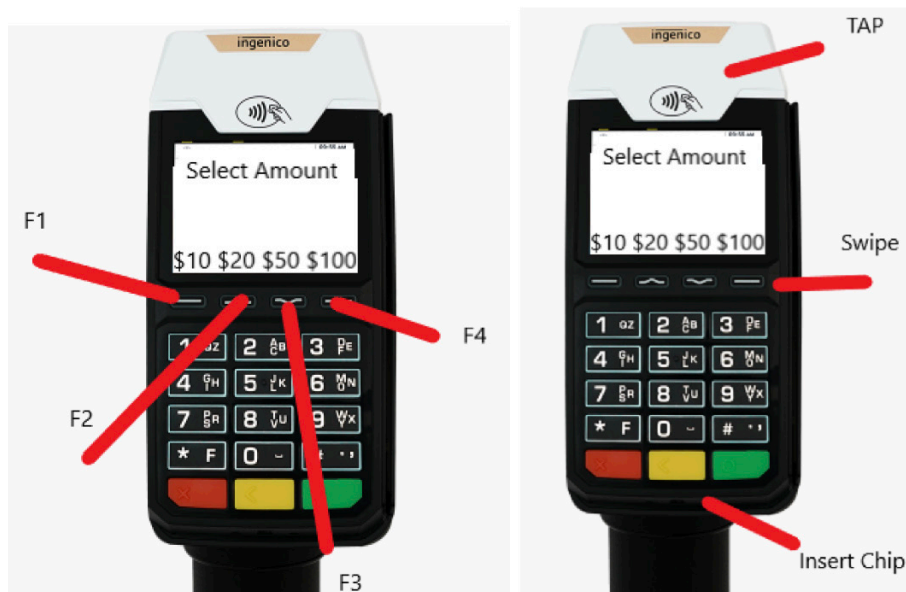

FREQUENTLY ASKED QUESTIONS

How do customers use the cashless payment device?

Customers use the cashless payment device by performing the following steps:

1. The customer selects a touch button from the following amount options: \$10, \$20, \$50, or \$100.
2. The customer will be prompted to either insert, swipe, or tap their credit card, debit card, prepaid card, or mobile device.
3. A message asking the customer to select “Debit” or “Credit” card will be displayed. Keep in mind prepaid cards are either credit or debit.
 - a. Prepaid cards that are debit can be processed like credit cards similar to regular debit cards or non-prepaid debit cards (debit cards tied to a checking account). Please note, in the event the customer has not set up a PIN, they can process the card as a credit card after selecting “credit” type.
 - b. Please note that there will be an initial (one) minute timeout if there is no action after a customer has selected an amount and the terminal is in the “insert, swipe, or tap” screen on the cashless device.
4. Once “Debit” or “Credit” is confirmed, the device will ask the customer to confirm the amount.
 - a. Please note that the customer may cancel their transaction by using the red button on the cashless payment device only up to the point that they confirm the amount again.

FREQUENTLY ASKED QUESTIONS

Players will be able to add additional **cashless funds** while on different game screens of the vending machine but only if there is no cash or re-investments (winnings from previously purchased games) in the session wallet. If there are already other non-cashless funds in the wallet, cash and re-investments must be used to make a purchase first before adding cashless funds. The same applies when adding cash or re-investments to a session that may contain cashless funds, the cashless funds must be used first.

Draw-based games (Mega Millions®, Powerball®, Lotto, Lucky Day Lotto®, Pick 3, and Pick 4), Instant Tickets, Fast Play™, and Fast Play Scan-N-Play ticket purchases cannot be canceled if they are purchased using the cashless payment option.

Players cannot cash out winnings from the vending machines. Winnings from different payment types (e.g. cash, reinvestment from redeemed winning tickets, cashless payments, etc) cannot be redeemed. The only scenario in which a player could receive a credit from a vending machine is when a terminal malfunctions while it is in use. In this case, the retailer could issue a Clear Credit voucher (refer to page 9 for more information on this topic).

What denominations can be purchased using the cashless payment device?

The cashless payment device will be configured to display the following amounts for a player to select: \$10, \$20, \$50, and \$100.

What are the daily and weekly purchase limits allowed for cashless payments?

The daily purchase limit for a cashless payment is set to \$100, and the weekly purchase limit is set to \$700 per transaction. Any transaction that would cause the daily or weekly limit to be exceeded will be declined. With respect to weekly purchase limits, a “week” is defined as Sunday 12:00 am CT to Saturday 11:59pm CT.

The cashless payment device communicates with the lottery terminal to monitor these restrictions and when the daily or weekly purchase amount is exceeded, the message, **“Exceeds Amount; Please Remove Card”** will appear on the cashless payment device.

SCENARIOS AND ERROR MESSAGES

Other scenarios and error messages that will be displayed on the terminal can be found below:

SCENARIO	TERMINAL MESSAGE
Generic/default terminal message	Feeling lucky? Select a game to purchase. Any amount placed on this terminal using a credit/debit card must be played. Be Smart, Play Smart®. Must be 18 or older to play.
Player using cashless device to add funds	Transaction in Progress. Please wait.
Communication error	Transaction timed out. Please try again.
Cashless funds added successfully	Transaction successful
Transaction was cancelled	Transaction cancelled
Transaction was declined	Transaction declined
Transaction was not successfully processed	Transaction not processed. Please contact call center - 833-515-0581
There is Cash In the terminal wallet. There is Cash and re-investments In the terminal wallet. There is Re-investments in the terminal wallet.	Please use all available funds before adding cashless funds
There are Cashless funds in the terminal wallet.	Please use all available funds before adding cash or re-investing winnings

When errors such as this occur, it may be best to direct them to Intralot's **Cashless Call Center at 833-515-0581.**

FREQUENTLY ASKED QUESTIONS

The **Cashless Call Center** will manage both retailer and player inquiries and will cover topics such as:

- Technical issues with the cashless payment device
- Transaction error on the cashless payment device
- Player has lost funds due to cashless payment on vending machine
- Player believes there is fraud on their card and wants to make a claim

It has been found that many times when a player has an issue with the machine, there is confusion on how to use the device and individual human error. The best solution is to direct players to the Cashless Center for all their inquiries. Their next option would be to contact their bank or card issuer if they are having issues with their payment option.

Who pays the cashless payment processing cost?

Cashless payment processing costs will be handled by the Illinois Lottery and Intralot. The costs for cashless payment processing will NOT be passed to retailers. Retailers will not be charged any fees or receive reduced commissions for cashless payment sales. There are no additional fees applied to retailers for the use of cashless options or the installation of cashless devices on the existing vending terminals.

What if I already accept card transactions for Lottery purchases at my store(s), will Intralot cover those payment processing costs as well?

No, Intralot nor the Illinois Lottery will be responsible for the payment processing cost that is associated with any retailer's existing agreement with card service providers.

What if a customer comes in and makes a large purchase on the vending machine and they did not win so they call their bank and report fraud, how does this affect the retailer?

As stated above, the retailer does not carry any burden of cost for having the cashless payment option on the vending machine. All fees associated with the cashless payment option are covered by Intralot. If a player has an issue and reports fraud, they should either contact their bank or the Cashless Contact Center to resolve the issue. The daily velocity limit of \$100 of cashless funds should also deter fraud from occurring in these situations.

Will the cashless payments go through the retailer's individual bank account like it currently does with cash payments?

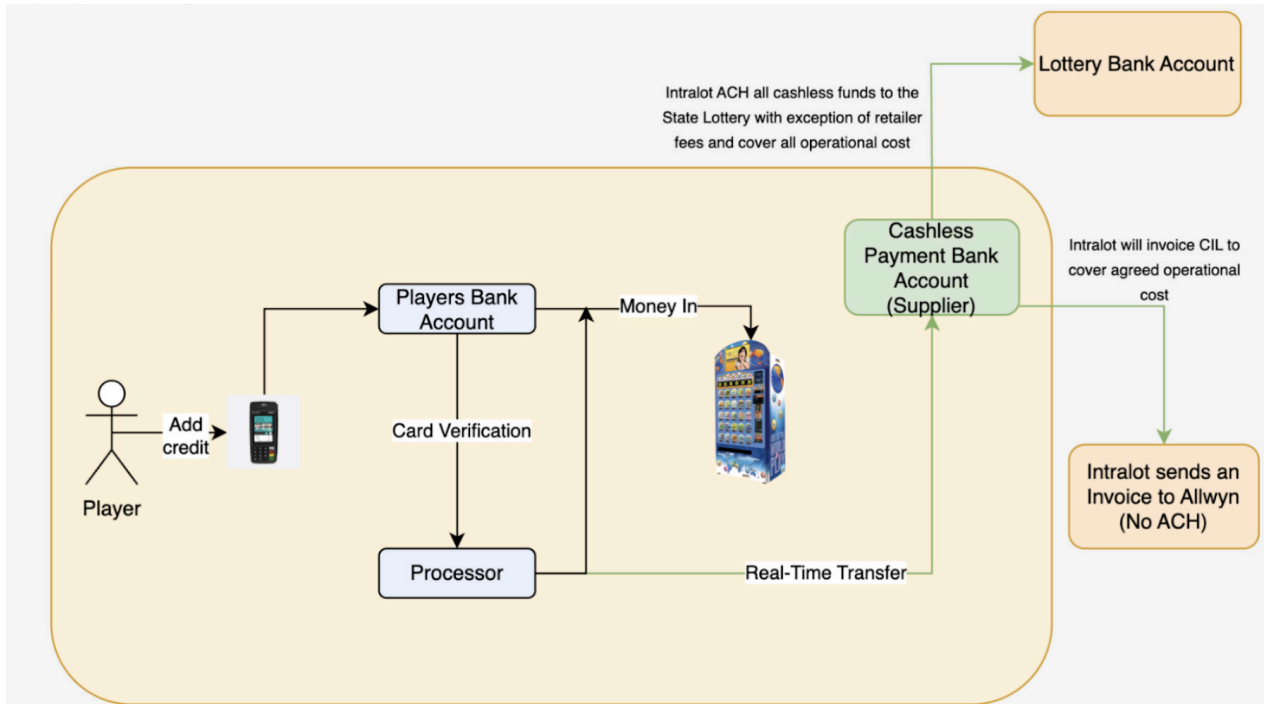

No, cashless payments will not go through the retailer's individual bank account or even Allwyn North America's financial accounts. Intralot will completely manage the relationship with the card payment provider (WorldPay) and cashless payments will be settled into an Intralot bank account before they are processed and passed on to the Lottery. This will ensure that the Lottery is not involved in any individual retailer agreements with card service providers. The following page shows a diagram of how the payment flow will occur:

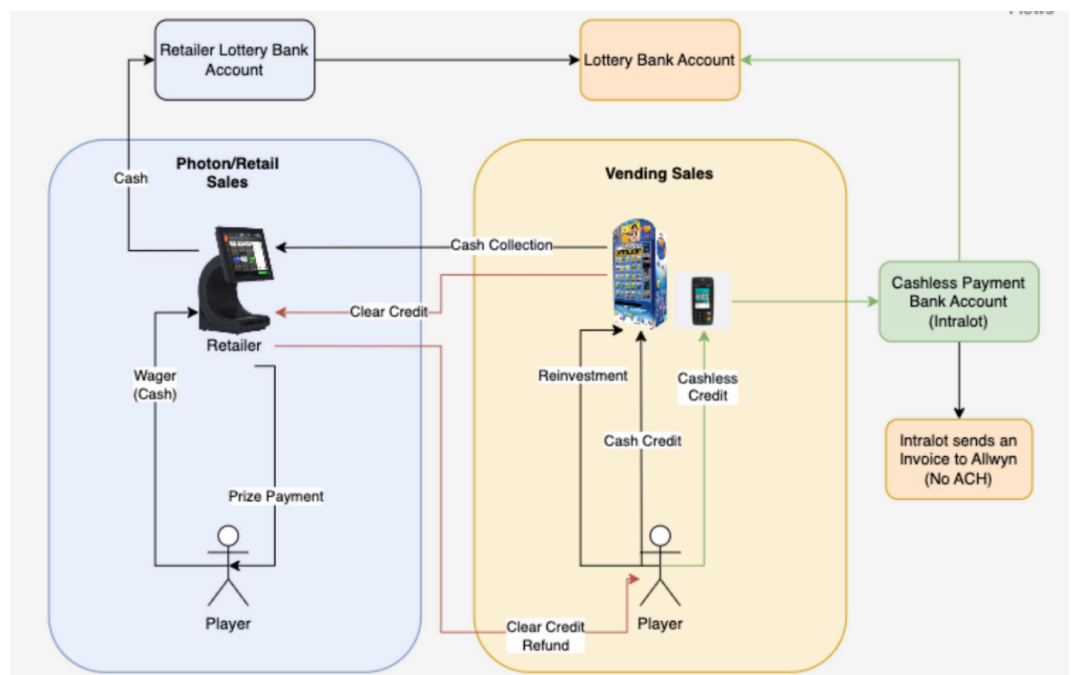

TRANSACTION FLOW

VENDING CASH/CASHLESS FLOW

Intralot will ensure that cashless funds are not collected from the retailer via the weekly sweep. Intralot is responsible for all operational costs of the cashless payment device.

COMPLETE FLOW WITH PHOTON TERMINAL

TRANSACTION FLOW

“Clear Credit” vouchers for the WIN30 and DTS vending machines

With the cashless payment device implementation, vending machine terminals will now have the ability to validate Clear Credit vouchers for purchases.

Clear Credit vouchers can only be cashed/validated using the vending machine terminal, and it can only be redeemed at the retailer where it was printed/generated and must be validated within two days of creation. After two days, Clear Credit vouchers will be purged for redemption. If you attempt to cash the Clear Credit voucher with another retailer, an error message will be displayed on the terminal screen. An error message will appear if it is attempted to be validated at photon. Clear Credit vouchers CANNOT be exchanged for cash. Please note, the voucher will not have an amount printed on it, but the barcode will allow the voucher to be redeemed at the vending machine terminal at the retailer where the voucher was created. Current photon refund functionality for cash Clear Credit vouchers will remain the same.

NOTE: Vouchers generated from vending machines, as part of the Clear Credit voucher process, will not receive game commissions until the funds are used. Abandoned vouchers created do not affect retailer financials. Only cashless credits used to make purchases affect retailer financials, unused cashless credits only affect the Lottery Pay Voucher/Session Audit report.

Retailer Accounting Flow

Cashless funds used on the vending machine do not affect the financial accounting for the individual retailer. Cashless funds transferred to the lottery terminal are a lottery liability. Cashless funds do not affect the individual retailer’s accounting until the cashless funds are used to purchase lottery tickets at that retailer.

All sales transactions for purchases of draw-based games, Fast Play, and Fast Play Scan-N-Play will be identified as cashless, cash, and re-investment, which effectively denotes the method of payment. Cash and cashless transactions will be tracked and stored separately by retailer and by game for commission calculation. Cashless amounts are credited back to the retailer to offset cashless sales.

A new transaction will be sent through the system for instant ticket purchases that occur through the Win30 and DTS vending machines. The transaction will include the cash or cashless amount that was used to make the purchase. Cash or cashless amounts will be tracked and stored separately by the retailer. Cashless amounts are credited back to the retailer to offset cashless sales. Instant ticket sales will be offset on the ticket level while settlements remain on the pack level. Retailers remain responsible for their internal instant ticket audit.

TRANSACTION FLOW

Sales Commission

New commission profiles for online games will be added to allow the commission calculation for cash sales to be separate from the commission calculation for cashless sales. Intralot will configure commission profiles by game. Cashless sales commission rates and cash sales commission rates will be the same at implementation (5% for IL).

Instant game sales commission is calculated on pack settlement.

NOTE: Instant game sales commission calculation will not change.
